

TechMart Electronics - Installation Guide

Fictional company knowledge base for the Multi-Agent AI Customer Support Assistant capstone.

SupportCloud desktop app

Download the installer from the customer portal, close other TechMart utilities, run the installer, and sign in with the registered account.

Windows issue

If installation is blocked, verify that Windows is updated, confirm at least 2 GB of free disk space, restart the computer, and rerun the installer as administrator.

macOS issue

If macOS blocks launch, confirm the application came from the official TechMart portal, then review Privacy & Security settings.

Login issue

If sign-in fails, verify the email address, use Forgot Password, and request a new reset link if the prior link is older than 30 minutes.

Persistent errors

Capture the exact error message and application version. If the documented steps do not resolve the issue, escalate to technical support.
