

TechMart Electronics - SupportCloud User Manual

Fictional company knowledge base for the Multi-Agent AI Customer Support Assistant capstone.

Dashboard

The dashboard shows connected devices, recent support conversations, storage use and account notifications.

Device sync

Premium and Business users can sync supported device settings. Devices must be online and signed in to the same organization.

Conversation history

Support conversations are saved to the signed-in account so customers can reopen previous discussions.

Security

Never share passwords or one-time codes with support. TechMart support will not request the customer's password.

Troubleshooting

For unexpected errors, record the error text, device model, operating system and steps that caused the problem.
